

DNA Test Report

*Animal Molecular Genetics Laboratory
University of Missouri
College of Veterinary Medicine*

Owner Information

Owner: Don Hunter
Address: 1379 N State Rt 635
City-St-Zip: Tiffin, OH 44880

Dog Information

Call Name: Taffy *Breed:* English Springer Spaniel
Registered Name: Ferndelles Pecan Pie
Reg Number: SR46262802
Sex: F *Birthdate:* 10/1/2007

AMGL Case #: 107308 *DNA Source:* FTA-swab
Testing Date: 5/14/2015
Test Run: PRA – Progressive Retinal Atrophy *Result:* Normal

Explanation of results:

NORMAL: This dog has tested normal (or clear) for the mutation causing the cone-rod form of PRA prevalent in this breed. It can only transmit a normal gene to offspring, and can be bred to a dog with any test result without producing affected offspring.

CARRIER: This dog has tested as a carrier for the mutation causing the cone-rod form of PRA prevalent in this breed. It is very unlikely to develop this form of PRA, but it may transmit either a normal gene or an affected gene to offspring.

AFFECTED: This dog has tested as an affected for the mutation causing the cone-rod form of PRA prevalent in this breed. It is at risk for developing clinical symptoms of PRA at some point in its lifetime. We do not presently have a way to predict when symptoms may appear.

Additional details available online at www.CanineGeneticDiseases.net, in PRA section.
